DAY TODAY BY PETER VIDAL

- ARIES (Mar 21 - Apr 20)**
Today's idealistic planetary pattern gives the worst of your feet as far as all long-term personal and professional matters are concerned. The short-term risk, especially as the weekend approaches, is confusion. But that should happen if your hopes are unrealistically high.
- TAURUS (Apr 21 - May 21)**
It looks certain that by the end of the month, the understanding, loyalty and devotion of special court partners will have made it possible for you to achieve cherished goals. You should also pay more attention to creative aspirations before circumstances move on.
- GEMINI (May 22 - June 21)**
I have referred to financial matters several times. It is not the trivial bank statements, pension books or investment accounts which is most important, but your long-term attitudes to money and the extent to which you use financial success as a marker to judge both yourself and others.
- CANCER (June 22 - July 23)**
Planetary perfection continues for some time. However, musclevats as today's stars are they are most helpful to those of you who are taking control of your own destinies. The more enthusiastic you are the better you do. Those who are waiting for something to turn up will probably miss out.
- LEO (July 24 - Aug 23)**
You now have the perfect opportunity to decide what your next move should be. The best way forward now is to go for long-term commitment rather than immediate gratification. Also, you might be a little too self-critical at the moment; don't be too down on yourself!
- LIBRA (Sep 24 - Oct 23)**
Sick to the nines and conventional methods by all means. But follow the spirit of the law rather than the letter. Make extra efforts to make men, women and children's demands and random pressures bow to your choice.
- SCORPIO (Oct 24 - Nov 23)**
Much of what you now find irritating or frustrating will be resolved by the end of the month. As the Moon as it moves through your chart like a psychic vacuum cleaner. If you must speak your mind, don't say anything you'll regret. After all, a word spoken in haste can be more costly to you than a great deal of wasted effort over the coming weeks.
- SAGITTARIUS (Nov 24 - Dec 22)**
Of all the signs of the Zodiac, yours is the most steady suited to the current enthusiastic planetary alignment. Over the next few days, you are likely to find out how much you have to gain from current developments in all areas of your life, even from apparent trifles.
- CAPRICORN (Dec 23 - Jan 20)**
Sound the trumpets and hang out the flags! The current magnetic environment is perfect for all of you who have momentary doubts as to your obligations to a world where you are getting to grips with your utterly unique personal destinies.
- AQUARIUS (Jan 21 - Feb 19)**
The Sun, planet in a sympathetic region of your chart offers one set of favourable influences, yet the Moon is subtly suggesting that you should face up to awkward decisions and developments at home. And it is also encouraging you to give pleasure to your partner.
- PISCES (Feb 20 - Mar 20)**
Now that Jupiter your ruling planet is refining its position in your environment and your personal life this month will be seen to be entirely beneficial. The truth of the matter may not be clear for another four months, though, so I fear you may have to be patient.
