ANTERIOR SHOULDER INSTABILITY REHABILITATION

- Itoi et al. popularize the idea of immobilization of the injured shoulder
- They reported a 0% recurrence risk with the arm immobilized in the ER position compared to the regular sling in internal rotation (IR) which had a 30% incidence of recurrence.

- Icing & TENS
- perform ER or IR exercises at lower degrees of abduction
- avoid exercises at 90° of abduction
- Passive motion is performed in the Scapular plane and diagonal patterns
- promotion of proprioceptive neuromuscular control
- pain-free submaximal isometrics
- Active-assisted motion is in a restricted arc.

MUHS Basic Workshop on Health Science Education Technology for Teachers

**Conducted at Sancheti Institute for Orthopaedics and Rehabilitation College of
Physiotherapy, Pune**

13th-15th Sept 2023

30 participants from Physiotherapy colleges of Maharashtra attended the Basic Health Science Education Technology workshop from 13th to 15th Sept 2023. The sessions were conducted by 6 faculties. The workshop started with a short 15 minutes inaugural and lamp lighting. The participants started the workshop with a pre-test, followed by ice breaking and further sessions were conducted as per schedule. At the end of the workshop, posttest was also conducted. The participants were divided into 5 sub-groups and all the activities were conducted in the same format as laid down by IMETT, MUHS.

Twice a day (morning and afternoon) attendance was taken for the participants as well as for the faculty. The participants have an improvement of 80% and above in pre and posttest difference of scores. The feedback (both qualitative and quantitative) has been analyzed and all the participants found the content of the workshop very informative and interactive and useful for teaching, learning and assessment domains. The participants also shared interest to undergo advanced HSET workshop.

All participants gave a microteaching session on the last day for which they self-assessed themselves as well as feedback was given by peer participants and faculty.

Each participant has submitted assignments on: one objective each from cognitive, psychomotor and affective domain and 5 MCQs of different cognitive levels.

The pre-post scores of the test and the pie chart is as follows:

Neuro Dynamic Solutions

Workshop-Report

Date : 28th - 31st December 2023

Time: 9:00 Am to 5:00 Pm

Venue: Sancheti Healthcare Academy

Introduction:

To cater a platform for having a better understanding of Neurodynamics, a four day workshop was organized from 28th of December to 31st of December at Sancheti Healthcare Academy for which we had Dr. Kiran Challagundla, Master of Ortho, sports and manual PT, Australia, as our resource person.

The workshop gave the participants an opportunity to understand the different concepts of Neuro dynamic assessment, management and the clinical techniques associated with it . This report provides an overview of the event, including its organization, participants, and outcomes.

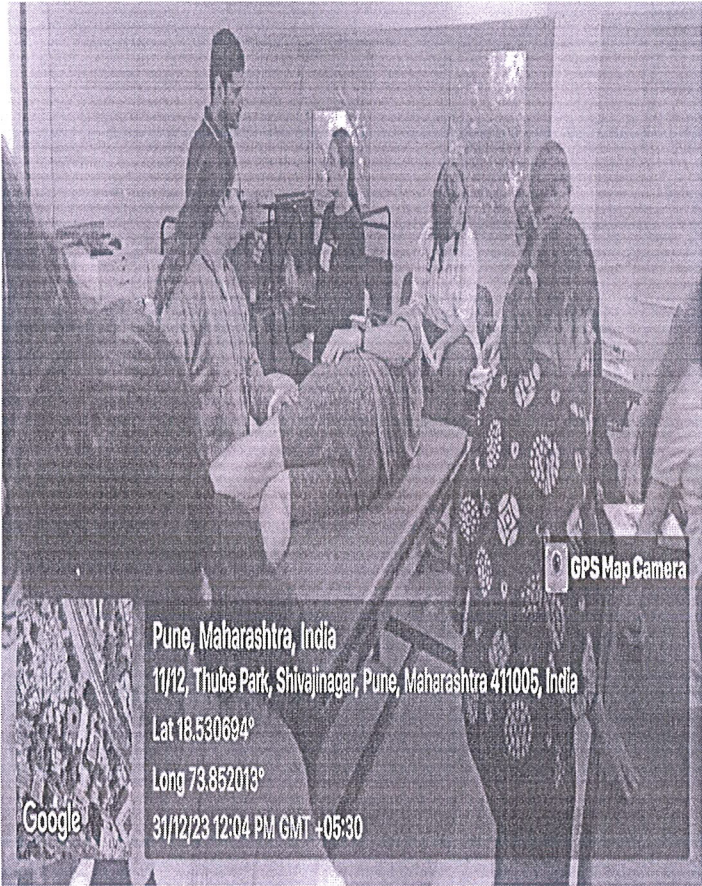

Participants:

There were 35 participants who were required to pre-register for the workshop while some being clinicians, academicians and interns, who received their certificates post the workshop. Participants Conclusion:

The workshop was a resounding success, achieving its goals. Participants left with a sense of accomplishment and inspiration to further work in this field which was very much evident from the feedback taken from all the participants' post the workshop. The organizers are already looking forward to hosting the next edition of the series.
